

A LEVEL:

Once again, we are pleased with these results, with students achieving their predicted grades or better.

The results of all of the students are indicative of the high quality of teaching and commitment of staff and students alike. Not only do the students deserve congratulations for their results, but we must also mention their dedication in all of the extra curricular aspects of school life in which they participate, thus helping them to gain places at their chosen Universities.

St. James' is a non selective school and therefore the academic potential and grades achieved will vary from year to year. In relation to their achievement at GCSE level, the results at Advanced Level in 2010 indicate a high level of value added. League tables, although important, are not the ultimate criteria on which we base the success of our students; the emphasis being on encouraging pupils to develop into well rounded successful individuals and achieve their maximum potential.
